EDUCATION

Teaching 09/2022 - 11/2022

Take on the responsibility of teaching a "Front-end Project" course for the Vietnam Australia center. This project includes the implementation process from requirements analysis, diagram/UI/UX design, and project building using React.JS & Next.JS. Then perform test, package, deployment, document, and complete the project report.

Software Testing - GST (2019)

Completed software quality assurance training course at FPT's GST company, achieving Class A certification. Gained experience in test planning, writing test cases, writing test reports, and advanced software testing techniques.

Bachelor of software engineering of Nong Lam University (2015 - 2019)

ACHIEVEMENTS

The degree of engineer 2020

The degree of software engineering information technology. Degree classification is **very good**

Tester Certificate 2019

In the Software Testing of GST course in 2019 I was awarded a type-A certificate by GST and invited to join their project without having to graduate from university.

Best Rookie Of The Year 2019

WORK EXPERIENCE

Full-stack Software Engineer - Prime Data VN

July 2020 - Present

As a skilled **Full-stack Software Engineer** at Prime Data VN, I have extensive experience in **developing** and **maintaining complex UI** components and features for their web application. I have worked closely with cross-functional teams to deliver high-quality software products, collaborating with UX designers to ensure that the application meets design standards and provides an exceptional user experience. With my expertise in **optimizing code** and **reducing load times**, I have successfully **improved** the application's performance, making it **more efficient and effective**. Furthermore, I have also taken on the role of a **mentor**, providing technical guidance to junior developers, and **sharing** my knowledge and experience to help the team grow and succeed.

Java Developer - Splus Software

Mar 2019 - July 2020

Here, I have successfully completed a wide range of projects, including websites, mobile apps, and internal tools, for both Japanese and American partners. Working in an outsourcing environment has given me valuable experience in interacting with clients from different cultures and backgrounds, enabling me to develop strong **communication** and **collaboration** skills. Exposure to different projects and deadlines has helped me improve software production processes and **time management** skills, ensuring timely delivery of high-quality projects. Using **Java**, **Spring**, and **React.JS**, I have contributed to the development of both front-end and back-end code, adhering to software development best practices and principles such as **code quality**, **testing**, and **documentation**. Collaborating with a team of developers and project managers has enabled me to showcase my excellent **problem-solving** skills and attention to detail, ensuring that all projects are completed to the highest standards of quality. Additionally, as an onsite representative for Mobivi and Synova companies, I have demonstrated strong communication and collaboration skills with both clients and internal teams, contributing to the growth and success of the company through consistent delivery of **high-quality** projects and dedication to personal and professional development.

Mobile App Developer - Mona Media

Mar 2020 - July 2020

As a mobile app developer, I am highly skilled in **React Native** development, with extensive experience in creating cross-platform apps with **reusable components**, implementing smooth animations, and integrating with native modules. Additionally, I possess excellent **problem-solving** and **troubleshooting** skills, with the ability to quickly identify and resolve complex issues using debugging tools, performance profiling, and other techniques. My adaptability and eagerness to **learn new technologies** have also been key factors in my success, enabling me to quickly pick up new frameworks, programming languages, or tools to complete a project.

Frontend Developer - Proptech Plus

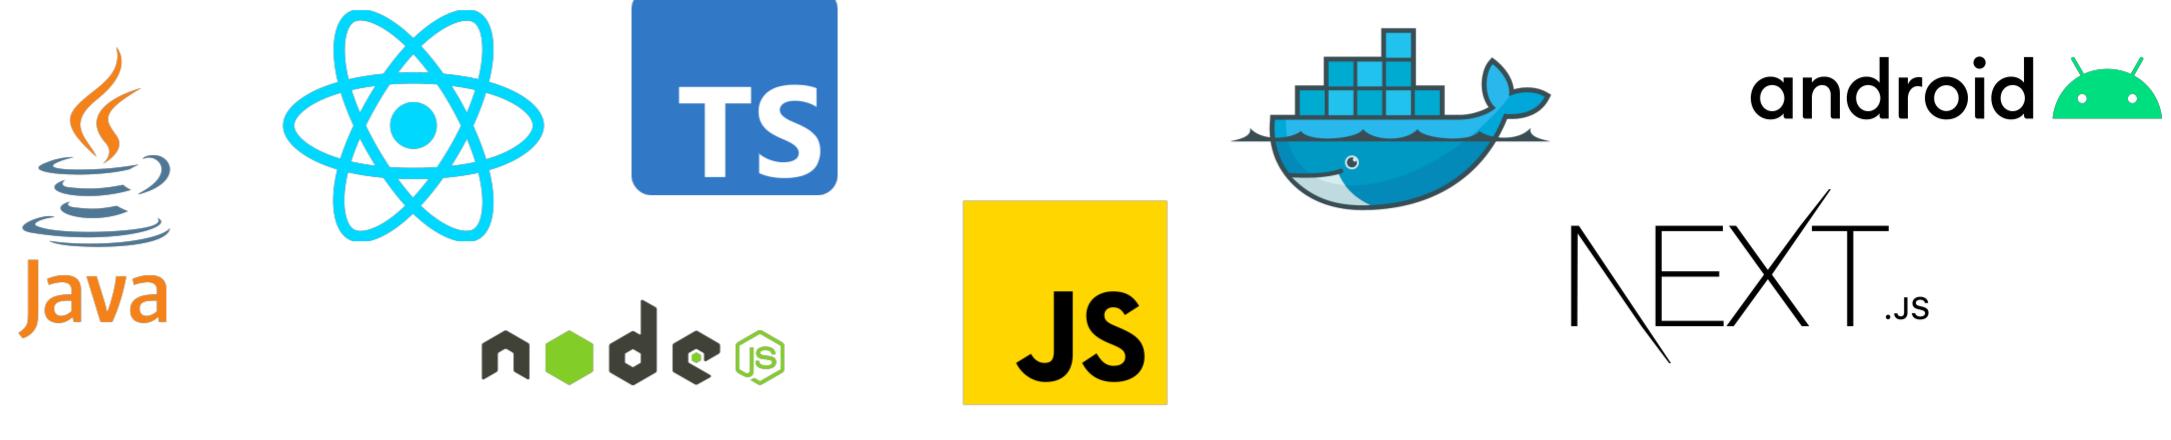

May 2018 - Jan 2019

As a skilled Fresher Front-end developer, I have built and maintained my company's main web application, utilizing **Redux** to manage state and ensure smooth application **performance**. Collaborating closely with the UX/UI design team, I have created a responsive and visually appealing front-end design for the company's property listing pages. Working in tandem with the back-end development team, I have integrated front-end code with the company's **RESTful API**, ensuring seamless **communication** between the front-end and back-end systems. I **stay up-to-date** with the latest front-end development technologies and **best practices and share** this knowledge with the team to improve overall code quality and efficiency. Additionally, I have contributed to the development of a comprehensive style guide and component library, ensuring **consistency** and **maintainability** of the front-end codebase.

ABOUT ME

A passionate individual who always thrives to work on end-to-end products which develop sustainable and scalable social and technical systems to create impact.

Front End Software Engineer with 4+ years of experience and strong fundamentals in Front-end technologies. Likes building scalable web infrastructure and making websites fast. Passionate about programming languages, and developer tooling.

SKILLS

- 4+ years** of experience in front-end development
- Strong proficiency in **JavaScript, DOM, HTML5, LESS, SASS/CSS3**
- Understanding of **SEO principles**.
- Experienced in **UI/UX design, performance optimization, testing, design pattern**, etc
- Experience with front-end frameworks such as **React, Vue.js, Redux, React Hooks, and other popular React libraries**.)
- Understanding the nature of **asynchronous programming**
- Familiarity with back-end technologies such as **Node.js, Java**
- Good knowledge of **data structures and algorithms**.
- Experience with front-end build tools such as **Webpack**
- Understanding of **responsive design and mobile-first** development principles
- Excellent **problem-solving** and **analytical** skills
- Strong attention to detail and ability to **write clean, maintainable code**
- Experience with **VCS** such as Git, GitLab, Bitbucket, SVN
- Passion for learning and staying up-to-date with the latest front-end development trends
- Ability to **work independently** and as part of a team
- Excellent verbal and written **communication** skills
